

Learn About Cryptocurrency May 21 & July 11, 2022

Perry Kundert

2022-04-09 12:17:00

It is dangerous to "invest" in something that you don't understand.

Unfortunately, it is **easy** to make Cryptocurrency difficult to understand; it is **much harder** to help people understand it!

Perry Kundert has been involved in Cryptocurrency since **long** before there was a "Bitcoin", and can help you to understand its elegant simplicity, power and security.

Matthew Brisebois works full-time in Cryptocurrency development, and is doing research and development on the next-generation breakthrough Holochain platform. He has helped many people get started with Cryptocurrency.

Come discover with us! Learn to wield the velvet-covered steel fist of Cryptocurrency, and become armed to defend yourself and your family's financial liberty. (PDF version)

1 Part 1: Understanding Cryptocurrency

Our course starts with the foundation: *Why* Cryptocurrency emerged, and *how* it achieves its surprising capabilities. If you're still undecided, here are some questions we'll be addressing.

By noon, you **will** understand Cryptocurrency, in surprising detail. No longer will it be a "mystery", and many of your uncertainties about using it will disappear.

2 Lunch (Free)

Have a bite to eat, and chat with your fellow (now Cryptocurrency-savvy) peers! This is a great way to cement what you've learned, and plan for the future.

3 Part 2: Let's Do This!

Once you've convinced **yourself** that financial liberty is something you want for your family, and that Cryptocurrency might help with that, we can (optionally) help you establish and fund your **personal** Cryptocurrency accounts.

Learn the process of depositing Fiat (CAD\$) funds to your Exchange account via e-transfer, buying Cryptocurrency (and learning how to sell it, later), and withdrawing the funds to your own a **personal** Cryptocurrency wallet.

3.1 Homework

If you want get a head-start on buying Cryptocurrency, and you would like to be able to actually transfer it into your personal Cryptocurrency wallet on the day of the course, then you'll need to do some homework!
